

CHANGE REQUEST DOCUMENT

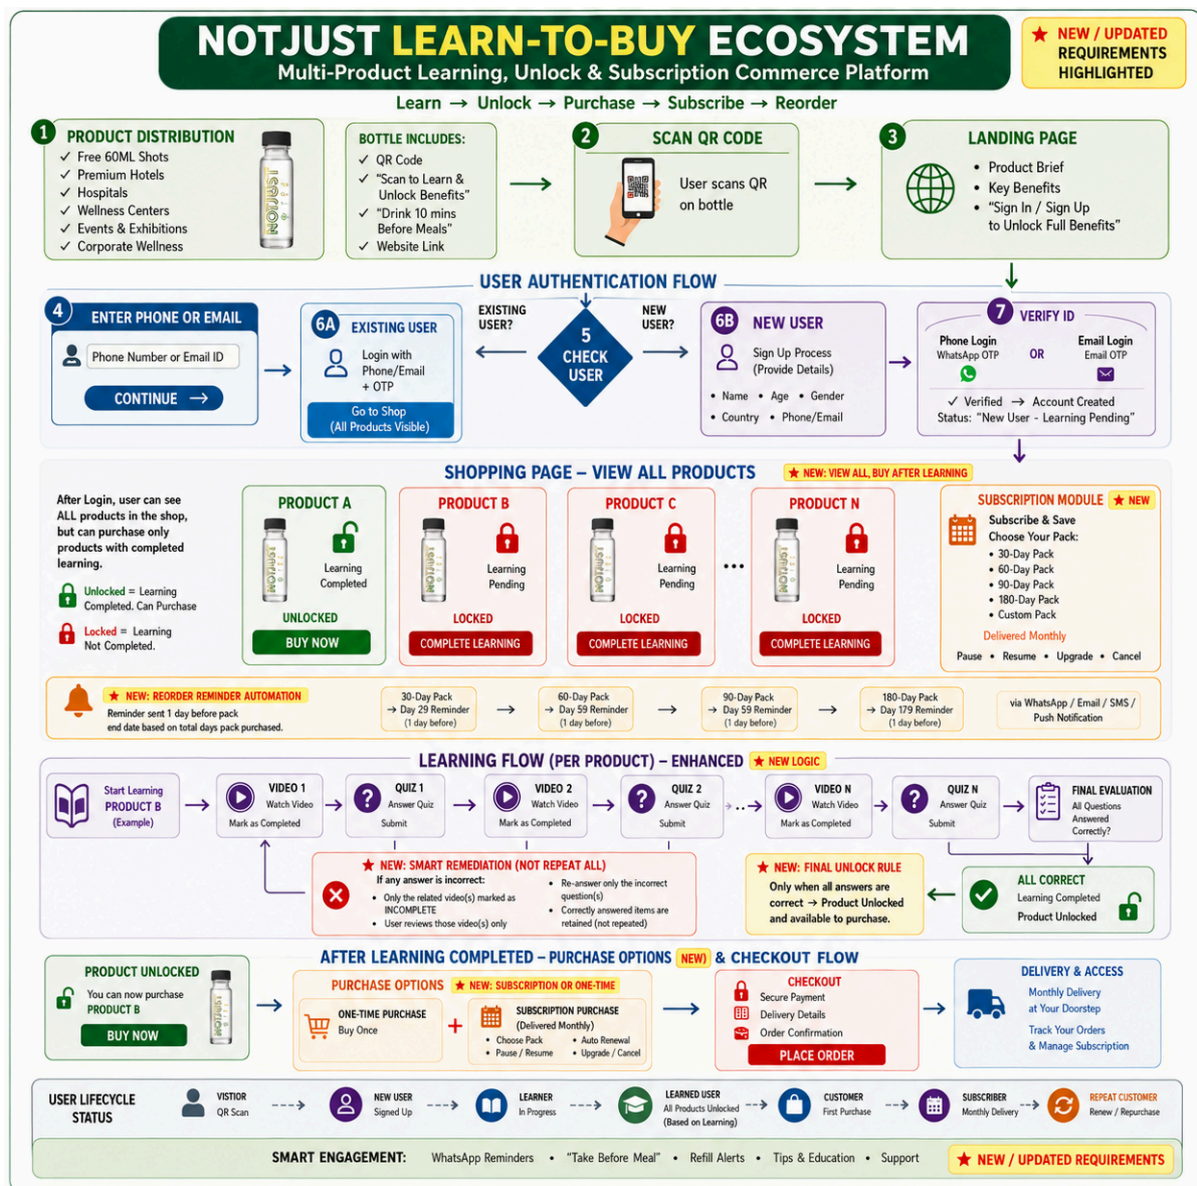

NOTJUST Learn-to-Buy Ecosystem

Revision 1.0 – Multi-Product Learning & Commerce Enhancement

Client: Opus Dei Foundation

Prepared By: Fepslin Athishmon S

Date: 19 June 2026

1. Purpose of Change Request

This document outlines additional requirements and modifications to the originally approved Project Scope Document for the Gatekept Commerce & Learning Platform.

The objective of these enhancements is to transform the platform from a single-product learning and commerce model into a scalable multi-product ecosystem where each product has its own independent learning journey and purchase authorization process.

2. Summary of Major Changes

The following enhancements are requested:

A. Multi-Product Learning-Based Commerce

Users can view all products immediately after login.

However:

- Users can purchase only products for which learning has been successfully completed.
- Products without completed learning must remain locked.
- Each product shall have an independent learning status.
- Learning completion for one product shall not unlock other products.

B. Product-Specific Learning Journey

Each product shall have its own:

- Learning videos
- Quiz questions
- Learning completion status
- Purchase unlock status

Example:

Product	Learning Status	Purchase Status
Product A	Completed	Unlocked
Product B	Pending	Locked
Product C	Pending	Locked

C. Updated Shopping Page Behavior

After login:

Users shall be able to view:

- Product A
- Product B
- Product C
- Product D
- Additional future products

For each product card display:

Product Information

- Product Image
- Product Name
- Short Description
- Key Benefits
- Learn More Button

Learning Status

If learning completed:

- Status = Unlocked
- Buy Now button enabled

If learning incomplete:

- Status = Locked
- Complete Learning button displayed
- Buy Now disabled

3. Revised Learning Module Requirements

3.1 Product Learning Flow

For every product:

Step 1

Video 1

↓

Step 2

Quiz 1

↓

Step 3

Video 2

↓

Step 4

Quiz 2

↓

Continue until final video and final quiz.

3.2 Progression Rules

Users may proceed to the next video after answering the associated quiz.

The system shall:

- Save progress after each video
- Save quiz responses
- Allow users to continue from where they stopped

3.3 Final Evaluation Logic

At completion of all videos and quizzes:

The system shall evaluate all quiz answers together.

Scenario A: All Answers Correct

System shall:

- Mark product learning as COMPLETE
- Unlock purchase access for that product
- Display congratulations message

Scenario B: One or More Answers Incorrect

System shall:

- Identify incorrect questions

- Identify corresponding video(s)
- Mark only those related videos as INCOMPLETE
- Require user to review only those videos
- Require user to answer only the related incorrect quiz questions again

The system shall NOT:

- Replay completed videos
- Re-ask correctly answered questions
- Reset entire learning progress

3.4 Smart Remediation Flow

Example:

Video 1 → Quiz 1 ✓ Correct

Video 2 → Quiz 2 ✗ Incorrect

Video 3 → Quiz 3 ✓ Correct

Final Evaluation Result:

Only Video 2 marked incomplete.

User Flow:

Review Video 2

↓

Retake Quiz 2

↓

Re-evaluation

↓

Unlock Product

This selective remediation approach is mandatory.

4. Learning Dashboard Requirements

The user dashboard shall display:

Product Learning Status

For each product:

- Not Started
- In Progress
- Pending Re-evaluation
- Completed
- Unlocked

Display:

- Progress Percentage
- Completed Videos
- Pending Videos
- Quiz Score

5. Product Unlock Logic

Purchase access shall be controlled independently.

Rules:

Product A

Learning Complete

→ Purchase Enabled

Product B

Learning Not Complete

→ Purchase Disabled

Product C

Learning Not Complete

→ Purchase Disabled

Users may simultaneously be:

- Unlocked for some products
- Locked for others

6. Subscription Commerce Module Enhancement

In addition to one-time purchases, add a Subscription Module.

6.1 Subscription Purchase Options

For unlocked products users may choose:

One-Time Purchase

Normal checkout

Subscription Purchase

Recurring delivery

6.2 Subscription Pack Types

Configurable packs:

- 30-Day Pack
- 60-Day Pack
- 90-Day Pack
- 180-Day Pack
- Custom Pack (Admin Configurable)

6.3 Subscription Features

Users shall be able to:

- Subscribe
- Pause Subscription
- Resume Subscription
- Upgrade Pack
- Downgrade Pack
- Cancel Subscription

6.4 Auto-Renewal Option

Optional:

- Enable Auto Renewal
- Disable Auto Renewal

Payment gateway integration required.

7. Reorder Reminder Automation

7.1 Reminder Logic

System shall calculate product consumption period based on pack purchased.

Formula:

Reminder Date = Pack Duration - 1 Day

Examples

30-Day Pack

Reminder on Day 29

60-Day Pack

Reminder on Day 59

90-Day Pack

Reminder on Day 89

180-Day Pack

Reminder on Day 179

7.2 Reminder Channels

Send reminders through:

- WhatsApp
- Email
- SMS
- Push Notifications

7.3 Reminder Content

Example:

"Your Product A supply is expected to finish tomorrow. Reorder now to avoid interruption."

Include:

- Reorder Button
- Subscription Upgrade Option
- Direct Checkout Link

8. Admin Panel Enhancements

Add new modules:

Product Learning Management

Admin can:

- Create Product
- Upload Videos
- Create Quizzes
- Link Quiz to Video
- Configure Pass Criteria

Product Unlock Analytics

Track:

- Learning Completion by Product
- Product Unlock Rate
- Quiz Success Rate
- Video Re-watch Rate
- Purchase Conversion by Product

Subscription Analytics

Track:

- Active Subscribers
- Subscription Revenue
- Renewal Rate
- Churn Rate
- Reorder Conversion Rate

9. Future Scalability Requirement

System architecture shall support:

- Unlimited products
- Independent learning journeys
- Independent unlock rules
- Independent subscription plans

without requiring structural redevelopment.

10. Expected Outcome

The revised platform shall function as a Learning-Gated Multi-Product Commerce Ecosystem where:

1. Users can view all products.
2. Products remain locked until learning is completed.
3. Learning is product-specific.
4. Only incorrectly answered content is reassigned.
5. Previously completed videos and quizzes are retained.
6. Product purchases are unlocked individually.
7. Subscription-based purchasing is supported.
8. Automated reorder reminders improve repeat purchases and retention.
